SPEECH AND LECTURE TOPICS

In his speeches, workshops and seminars, which include a wealth of information and entertainment, Christian Bischoff will give you the 15 basic principles that every company and every person needs to be successful.

Christian puts great emphasis on pragmatism and simplicity, as most companies and people make everyday business way too complicated. He is convinced that will power is the key to success.

He believes that change only happens when you change. A company itself can only be more successful, if the employees change and become more successful. Regarding all these issues, Christian has amazingly simple answers and proven implementation tips.

Christian Bischoff's keynotes are the ideal highlight for your event and have a long lasting impact by the use of easy-to-understand language, visual examples, and memorable metaphors - brilliantly mixed with lots of humor, practical examples and interaction with the audience. Christian succeeds like no other, to make you "take a real look" at yourself, think, reflect and act towards making changes. He leaves you no other choice than to start with yourself.
